

Job Description:

To support the development, implementation, and optimization of Artificial Intelligence solutions that enhance business processes, automate operations, and enable data-driven decision making across the organization.

Qualifications and Skills:

- Bachelor's in Artificial Intelligence, Computer Science, Data Science, Software Engineering.
- Additional certifications in Machine Learning, AI, Data Analytics, or Cloud AI platforms will be preferred.
- 1-2 years of relevant experience in Artificial Intelligence, Machine Learning, Data Science, or Advanced Analytics.
- Proficiency in Python or other programming languages used in AI/ML development.

1. AI Model Development & Implementation

- Design and support in deployment of Artificial Intelligence and Machine Learning models for business applications.
- Support development of predictive analytics and intelligent automation solutions.
- Test and optimize AI algorithms to improve performance and accuracy.

2. Data Management & Analysis

- Analyze datasets to identify patterns, insights, and opportunities for AI-driven solutions.
- Ensure proper data preparation, cleaning, and preprocessing for machine learning models.

3. AI Integration & System Support

- Integrate AI solutions with existing enterprise systems and applications.
- Work with IT teams to ensure seamless deployment of AI tools within the organization's infrastructure.
- Monitor AI system performance and troubleshoot technical issues.

4. Automation & Process Improvement

- Identify opportunities to automate manual processes using AI technologies.
- Develop AI-based tools that improve operational efficiency and productivity.
- Support digital transformation initiatives through intelligent automation.

5. Research & Innovation

- Research emerging AI technologies, frameworks, and tools.
- Stay updated with global AI trends and best practices.

6. Collaboration & Stakeholder Support

- Work closely with business units to understand operational challenges and propose AI solutions.
- Provide technical support and guidance to internal teams using AI tools.
- Assist in training staff on AI-enabled systems and data analytics tools.

7. Governance, Compliance & Security

- Assist in documentation of AI models, processes, and implementation procedures.

8. Group Companies

- Support group companies in implementing the overall Artificial Intelligence strategy aligned with business objective
- Strive to enhance operational efficiency, automation, and the overall customer experience across all group companies.
- Promote compliance with AI governance policies and frameworks across all group companies, while supporting the integration of AI solutions into daily operations and business processes.
