SHIRAZI TRADING COMPANY
(PRIVATE) LIMITED

AUDITED FINANCIAL STATEMENTS

FOR THE YEAR ENDED
JUNE 30, 2024

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF SHIRAZI TRADING COMPANY (PRIVATE) LIMITED

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

We have audited the annexed financial statements of Shirazi Trading Company (Private) Limited (the Company), which comprise the statement of financial position as at June 30, 2024, and the statement of profit or loss and other comprehensive income, the statement of changes in equity, the statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information and other explanatory information, and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of the audit.

In our opinion and to the best of our information and according to the explanations given to us, the statement of financial position, the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes forming part thereof conform with the accounting and reporting standards as applicable in Pakistan and give the information required by the Companies Act, 2017 (XIX of 2017), in the manner so required and respectively give a true and fair view of the state of the Company's affairs as at June 30, 2024 and of the profit and other comprehensive income, the changes in equity and its cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants as adopted by the Institute of Chartered Accountants of Pakistan (the Code) and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the Financial Statements and Auditors' Report Thereon

Management is responsible for the other information. The other information comprises of the Directors' Report (but does not include the financial statements and our auditors' report thereon).

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

SHC

Responsibilities of Management and Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of directors are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.

SHC

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

Based on our audit, we further report that in our opinion:

a) proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);

b) the statement of financial position, the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes thereon have been drawn up in conformity with the Companies Act, 2017 (XIX of 2017) and are in agreement with the books of account and returns;

c) investments made, expenditure incurred and guarantees extended during the year were for the purpose of the Company's business; and

d) no Zakat was deductible at source under the Zakat and Ushr Ordinance, 1980 (XVIII of 1980).

The engagement partner on the audit resulting in this independent auditors' report is Raheel Ahmed.

Net cash generated from / (used in) operating activities - carried forward	**599,296,687**	(227,108,310)

SHIRAZI TRADING COMPANY (PRIVATE) LIMITED
STATEMENT OF CASH FLOWS
FOR THE YEAR ENDED JUNE 30, 2024

	2024	2023
	-------- Rupees --------	
Net cash generated from / (used in) operating activities - brought forward	599,296,687	(227,108,310)
Cash flows from investing activities		
Purchase of property and equipment	(119,129,834)	(60,117,901)
Proceeds from sale of property and equipment	33,666,479	40,143,171
Investments made during the year	(55,117,306)	(67,000,000)
Proceeds from sale of investments	20,437,252	-
Net cash used in investing activities	(120,143,409)	(86,974,730)
Cash flows from financing activities		
Lease rentals paid	(140,751,573)	(110,845,428)
Long term borrowings - repaid	-	(36,910,783)
Short term borrowings - net	(263,656,026)	183,460,847
Dividend paid	(75,000,000)	(141,250,000)
Net cash used in financing activities	(479,407,599)	(105,545,364)
Net decrease in cash and cash equivalents	(254,321)	(419,628,404)
Cash and cash equivalents at beginning of year	695,848	420,324,252
Cash and cash equivalents at end of year	441,527	695,848

The annexed notes 1 to 40 form an integral part of these financial statements.

Chief Executive | Director | Chairman

SHIRAZI TRADING COMPANY (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED JUNE 30, 2024

1. LEGAL STATUS AND NATURE OF BUSINESS

Shirazi Trading Company (Private) Limited (the Company) was incorporated in Pakistan as a private limited company on 20 June 1975 under the Companies Act, 1913 (now Companies Act, 2017). The Company is a wholly owned subsidiary of Shirazi Investments (Private) Limited (the Holding Company). The Company is primarily engaged in the business of trading and maintenance of office equipment, power generators, security and medical equipment, trading of automotive parts and trading of motorcycle under hire purchase arrangement. The Company has countrywide sales and service network and its branches are located at Karachi, Lahore, Islamabad, Multan and Peshawar.

Business Unit	**Geographical location and address**
Registered Office	Plot No. 114C, Al-Murtaza Commercial Lane-3, Khayaban-e-Iqbal, Phase VIII, (DHA), Karachi.
Branch Offices	
Karachi	2nd Floor, Nadir House, I.I.Chundrigar Road, Karachi.
Lahore	Plot No. 67/A Block XX, Phase III, (Commercial), DHA Lahore.
Islamabad	Plot No. 41 Sector F-6/G6, Attaturk Avenue, East End Plaza, Blue Area, Islamabad.
Multan	Atlas Group Building, Azmat Wasti Road, Near Dera Addah, Multan.
Peshawar	4th Floor, Marhaba I.T. Tower, University Road, Peshawar.

2. BASIS OF PREPARATION

2.1 Statement of compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards applicable in Pakistan comprise:

- International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017; and
- Provision of and directives issued under the Companies Act, 2017.

Where provision of and directives issued under the Companies Act, 2017 differ from the IFRS, the provision of and directives issued under the Companies Act, 2017 have been followed.

2.2 Functional and presentation currency

These financial statements are presented in Pakistan Rupees which is the functional and presentation currency of the Company.

2.3 New and amended standards and interpretations

2.3.1 Standards, amendments to approved accounting standards effective in the current year

New and amended standards mandatory for the first time for the financial year beginning July 1, 2023.

(a) IAS 1 **Disclosure of accounting policies** **Effective date : January 1, 2023**

Amendments to IAS 1, 'Presentation of Financial Statements' includes requiring companies to disclose their material accounting policies rather than their significant accounting policies, clarifying that accounting policies related to immaterial transactions, other events or conditions are themselves immaterial and as such need not be disclosed and also clarifying that not all accounting policies that relate to material transactions, other events or conditions are themselves material to a company's financial statements.

(b) IAS 8 **Definition of accounting estimates** **Effective date : January 1, 2023**

The International Accounting Standards Board (the Board) has issued these amendments to end diversity in treatment of accounting estimates and clarified how companies should distinguish changes in accounting policies from changes in accounting estimates, with a primary focus on the definition of and clarifications on accounting estimates. Developing an accounting estimate includes both selecting a measurement technique (estimation or valuation technique) – e.g. an estimation technique used to measure a loss allowance for expected credit losses when applying IFRS 9 Financial Instruments; and – choosing the inputs to be used when applying the chosen measurement technique – e.g. the expected cash outflows for determining a provision for warranty obligations when applying IAS 37 Provisions, Contingent Liabilities and Contingent Assets. The effects of changes in such inputs or measurement techniques are changes in accounting estimates.

(c) IAS 12 **Deferred tax** **Effective date : January 1, 2023**

The amendments narrow the scope of the initial recognition exemption (IRE) so that it does not apply to transactions that give rise to equal and offsetting temporary differences. As a result, companies will need to recognise a deferred tax asset and a deferred tax liability for temporary differences arising on initial recognition of a lease and a decommissioning provision.

The other new standards, amendments to approved accounting standards and interpretations that are mandatory for the financial year beginning on July 1, 2023 are considered not to be relevant or to have any significant effect on the Company's financial reporting and operations.

2.3.2 **Standards, amendments to approved accounting standards and interpretations that are not yet effective and have not been early adopted by the Company**

The following new standards and amendments to approved accounting standards are not effective for the financial year beginning on July 1, 2023 and have not been early adopted by the Company:

(a) IAS 1 **Classification of liabilities as current and non-current** **Effective date : January 1, 2024**

Under existing IAS 1 requirements, companies classify a liability as current when theydo not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. As part of this amendments, the requirement for a right to be unconditional has been removed and instead, the amendments requires that a right to defer settlement must have substance and exist at the end of the reporting period. This right may be subject to a company complying with conditions (covenants) specified in a loan arrangement. At October 31, 2022, after reconsidering certain aspects of the amendments, the IASB reconfirmed that only covenants with which a company must comply on or before the reporting date affect the classification of a liability as current or non-current. Covenants with which the company must comply after the reporting date (i.e. future covenants) do not affect a liability's classification at that date. However, when non-current liabilities are subject to future covenants, companies will now need to disclose information to help users understand the risk that those liabilities could become repayable within 12 months after the reporting date.

(b) IAS 21 **Lack of exchangeability** **Effective date : January 1, 2025**

Amendments to IAS 21 'The effects of Changes in Foreign Exchange Rates' address situations where a currency may lack exchangeability, often due to government imposed controls. In such cases, companies must estimate a spot exchange rate reflecting orderly transactions at the measurement date. The amendments provide flexibility, allowing the use of observable rates without adjustment or other estimation techniques, provided they meet the estimation objective. The assessment considers factors like the availability of multiple rates, purpose, nature, and update frequency. The amendments requires new disclosures, including the nature and financial impact of non-exchangeability, the spot exchange rate used, the estimation process, and associated risks.

The management anticipates that the adoption of the above standards, amendments and interpretations in future periods, will have no material impact on the financial statements other than in presentation / disclosures. There are a number of other standards, amendments and interpretations to the published standards that are not yet effective and are also not relevant to the Company and, therefore, have not been presented here.

3. BASIS OF MEASUREMENT

3.1 These financial statements have been prepared under the historical cost convention except for stock in trade that are carried at lower of cost or net realisable value and certain employee retirement benefits which are measured at present value of defined benefit obligation less fair value of plan assets.

3.2 **Significant accounting estimated and judgments**

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the result of which forms the basis of making judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

The areas where various assumptions and estimates are significant to the Company's financial statements or where judgment was exercised in application of accounting policies are as follows:

(i) Estimate of useful lives and residual values of property and equipment and intangible assets [note 4.1 and 4.2]

(ii) Lease term and discount rate for calculation of lease liabilities along with renewal and termination options [notes 4.1.2]

(iii) Provision for obsolete stock [note 4.7]

(iv) Provision for expected credit losses [note 4.8]

(v) Estimate of payables and receivables in respect of employees' retirement benefits [note 4.11]

(vi) Recognition of taxation [note 4.13]

4. MATERIAL ACCOUNTING POLICY INFORMATION

The material accounting policies set out below have been applied consistently to all years presented in these financial statements, unless otherwise stated.

4.1 **Property and equipment**

4.1.1 **Owned assets**

Operating fixed assets are stated at cost less accumulated depreciation and impairment loss, if any. Capital work in progress is stated at cost and are transferred to specific assets as and when assets are available for use.

Subsequent costs

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Normal repairs and maintenance are charged to expenses as and when incurred.

Depreciation

Depreciation is charged to statement of profit or loss on the reducing balance basis except for mobile phones classified in office equipment. Depreciation on mobile phone is charged to statement of profit or loss on a straight-line basis. Depreciation is charged at the rates stated in note 6.1. Depreciation on additions is charged from the month the assets are available for use while no depreciation is charged in the month in which asset is disposed off

The depreciation method and useful lives of items of operating fixed assets are reviewed periodically and altered if circumstances or expectations have changed significantly. Any change is accounted for as a change in accounting estimate by changing depreciation charge for the current and future periods.

Disposal

An item of operating fixed assets is de-recognised upon disposal or when no future economic benefits are expected from its use or disposal. Gains or losses on disposal or retirement of operating fixed assets are determined as the difference between the sale proceeds and the carrying amount of assets and are included in the statement of profit or loss.

4.1.2 **Right of use assets**

The Company generally leases regional offices, warehouses, related properties and motor vehicles. At the inception of a contract, the Company assesses whether a contract is, or contains, a lease based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The extension and termination options are incorporated in determination of lease term only when the Company is reasonably certain to exercise these options.

Right of use assets are initially measured based on the initial amount of the lease liabilities adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentive received. The carrying amount of the right of use asset is reduced by impairment losses, if any. At transition, the Company recognised right of use assets equal to the present value of lease payments. Leased vehicles are depreciated on reducing balance whereas leased sales offices and warehouses are depreciated on straight line basis over the shorter of lease term and the estimated useful lives of the assets as follows:

Sales offices and warehouses	5 years
Motor vehicles	5 years

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short term leases and leases of low value assets. The Company recognises lease liabilities to make lease payments and right of use assets representing the right to use the underlying assets.

Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date, where the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

The Company's lease liabilities are disclosed separately in the financial statements refer nore 21 to these financial statements.

Short term leases and leases of low-value assets

The Company applies the short term lease recognition exemption to its short term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low value assets recognition exemption to leases that are considered to be low value. Lease payments on short term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Determining the lease term of contracts with renewal and termination options – Company as lessee

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Company has several lease contracts that include extension and termination options. The Company applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customisation to the leased asset).

Leases - Estimating the incremental borrowing rate

Where the Company cannot readily determine the interest rate implicit in the lease, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Company 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Company estimates the IBR using observable inputs (such as market interest rates).

4.2 Intangible assets

Intangible assets are stated at cost less accumulated amortisation and impairment loss, if any, and represent the purchase price, implementation costs and other direct costs of computer's software programs and software licenses.

The costs associated with maintaining computer software programs are recognised as an expense as incurred. Costs that are directly associated with identifiable and unique software products controlled by the Company and will probably generate economic benefits exceeding costs beyond one year, are recognised as intangible assets. Direct costs include staff cost, costs of the software development team and an appropriate portion of relevant overheads.

Subsequent expenditure

Expenditure which enhances or extends the performance of computer software programmes beyond their original specifications is recognised as a capital improvement and added to the original cost of the software.

Amortisation

Intangible assets are amortised using the straight line method over the useful lives of assets ranging from three to five years. The assets' useful lives are reviewed at each reporting date and adjusted if the impact on amortisation is significant.

4.3 Impairment of non-financial assets

The carrying amounts of non-financial assets other than inventories and deferred tax asset are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. The recoverable amount of an asset or cash-generating unit is the greater of its value-in-use and its fair value less costs to sell. In assessing value-in-use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets ("the cash-generating unit, or CGU").

4.4 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

4.4.1 Financial assets

Initial recognition and measurement

Under IFRS 9, on initial recognition, a financial asset is classified as measured at: amortised cost; Fair Value through Other Comprehensive Income (FVOCI) – debt instrument or Fair Value through Profit or Loss (FVTPL).

The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of a debt instrument that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

A financial asset (unless it is a trade receivable without a significant financing component that is initially measured at the transaction price, determined under IFRS 15) is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost (debt instruments). These are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired. The Company's financial assets at amortised cost includes trade receivables.
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments).
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments).
- Financial assets at fair value through profit or loss.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's statement of financial position) when:

- The rights to receive cash flows from the asset have expired; or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either:

(i) the Company has transferred substantially all the risks and rewards of the asset, or

(ii) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

4.4.2 Financial liabilities

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade payables, short term borrowings, long term deposits, other payables and accruals.

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Gains or losses on liabilities held for trading are recognised in the statement of profit or loss. Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Company has not designated any financial liability as fair value through profit or loss.

Borrowings

This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

The benefit of a government loan at a below market rate of interest is treated as a government grant. The benefit of the below-market rate of interest shall be measured as the difference between the initial fair value of the loan determined at the market interest rate and the proceeds received.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss. This category generally applies to interest-bearing loans and borrowings.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

4.5 Off-setting of financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

4.6 Expected credit losses on financial assets

IFRS 9 requires the Company to record an allowance for expected credit losses (ECLs) with a forward-looking approach for all loans and other debt financial assets not held at FVPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an approximation to the asset's original effective interest rate.

The Company considers a financial asset in default when contractual payments are past due ranging from 210 days to 300 days depending upon customer segment. However, in certain cases, the Company may also consider a financial asset to be in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

The Company has applied the standard's simplified approach and calculated ECL based on life-time ECL on its financial assets. The Company has established a provision matrix that is based on the Company's historical credit loss experience, adjusted for forward-looking factors specific to the financial assets and the economic environment. The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. The expected credit losses are recognised in the statement of profit or loss.

4.7 Stock in trade

Stock in trade, except items in transit, is valued at the lower of average purchase cost and net realizable value.

Stock in transit are valued at cost comprising of invoice value plus other charges accumulated upto the reporting date.

Net realizable value is the estimated selling price in the ordinary course of business less costs necessary to be incurred in order to make the sale.

Provision is made in the financial statements for slow moving and obsolete items, if any.

4.8 Trade debts, contract assets and other receivables related impairments

Trade debts and other receivables are classified as financial assets at amortised cost according to IFRS 9.

Trade debts are initially recognised at original invoice amount which is the fair value of the consideration to be received in future and subsequently measured at cost less provision for expected credit loss. The Company uses simplified approach for measuring the expected credit losses for all trade and other receivables including contract assets based on lifetime expected credit losses. The Company has estimated the credit losses using a provision matrix where trade receivables are grouped based on different customer attributes along with historical, current and forward looking assumptions. Debts considered irrecoverable are written off.

4.9 Contract assets

A contract asset exists when an entity transfers goods or services to a customer but does not yet have an unconditional right to consideration. A right is unconditional if nothing other than the passage of time is required before the payment of that consideration is due.

A contract asset is initially recognised from revenue earned from after sales services because the receipt of consideration is conditional upon satisfactory performance of the goods transferred to customers upon completion of the performance obligation the contract asset is reclassified to trade receivables.

4.10 Cash and cash equivalents

Cash and cash equivalents are carried in the statement of financial position at amortised cost. For the purpose of cash flow statement, cash and cash equivalents comprise of balances with banks.

4.11 Retirement benefit obligations

The Company has following plans for its employees:

4.11.1 Defined contribution plans

A defined contribution plan is a post-employment benefit under which an entity pays fixed contribution into a separate entity and will have no legal or constructive obligation to pay further amounts. The obligation for contribution to a defined contribution plan is recognised as an employee service benefit expense in the profit and loss account when it is due.

The Company operates defined contribution plans for its permanent employees through either one of the following ways:

- a recognised provident fund (the Fund); or
- voluntary pension schemes managed by Atlas Asset Management Limited, a related party, under the Voluntary Pension System Rules, 2005, viz, Atlas Pension Fund and Atlas Pension Islamic Fund.

All the newly appointed employees are offered voluntary pension scheme only. However, those employees who are provident fund trust members, have the option to opt for either of two above mentioned defined contribution plans.

Equal monthly contributions at the rate of 11% of the basic salary are made to the Fund / scheme, both by the Company and the employees. The Fund is a separate legal entity and its assets are being held separately under the control of its trustees.

4.11.2 Defined benefit plans

Defined benefit plan is a post-employment benefit plan other than the defined contribution plan. The Company's net obligation in respect of a defined benefit plan is calculated by estimating the amount of future benefit that employees have earned in return for their services in current and prior periods, and that benefit is discounted to determine its present value.

The Company operates an approved and funded gratuity scheme for its management staff and non management staff who have completed the minimum qualifying period of service for entitlement of gratuity. Contributions under the scheme are made on the basis of actuarial valuation and are charged to statement of profit or loss account. The actuarial valuation of both the schemes was carried out on June 30, 2024 using the "Projected Unit Credit Method".

The amount arising as a result of re-measurements are recognised in the statement of financial position immediately, with a charge or credit to other comprehensive income in the periods in which they occur. Past service cost, if any, are recognised immediately in profit and loss account.

4.11.3 Employees compensated leave absences

Employee entitlements to annual leave are recognized when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the reporting date using their current salary levels. No actuarial valuation of compensated absences is carried out as the management considers that the financial impact is not material.

4.12 Trade and other payables

Liabilities for trade and other payables are carried at their amortised cost, which approximates fair value of the consideration to be paid in future for goods and services received, whether or not billed to the Company.

4.13 Taxation

The tax expense for the year comprises of current and deferred tax. Tax is recognised in the profit and loss account, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

The Company designate the amount calculated on taxable income using the notified tax rate as an income tax within the scope of IAS 12 'Income Taxes' and recognise it as current income tax expense. Any excess over the amount designated as income tax, is then recognised as a levy falling under the scope of IFRIC 21/IAS 37.

Current

Provision for current taxation is based on taxable income at the enacted or substantively enacted rates of taxation after taking into account available tax credits and rebates, if any. The charge for current tax includes adjustments to charge for prior years, if any. However, for income covered under final tax regime, taxation is based on applicable tax rules under such regime.

Deferred

Deferred tax is recognised using the balance sheet method in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements.

Deferred tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the reporting date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

4.14 Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the obligation can be made. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

4.15 Contract liabilities

A contract liability is recognised if a payment is received or a payment is due (whichever is earlier) from a customer before the Company transfers the related goods or services. Contract liabilities are recognised as revenue when the Company performs under the contract (i.e., transfers control of the related goods or services to the customer).

4.16 Revenue recognition

The Company is mainly involved in trading activity which involves import of goods and sale without any value addition to the customers which generally include single performance obligation. Further, company offer after sales services contracts with healthcare and office equipment.

The Company's contracts with customers for the sale of goods generally include one performance obligation. The Company has concluded that revenue from sale of goods should be recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the goods. Whereas in case of hire-purchase sales, earned carrying charges representing difference between the cash sale price and hire purchase price shall be recognized in the statement of profit and loss using effective interest rate method over the arrangement period. Payment is generally due within 2 to 24 months from the date of invoice to the customer depending upon customer segments.

The Company recognises revenue from services rendered at a point in time as well as over time as required by the contracts with customers. Revenue from point in time service contracts is recognised as an when the services are received by customers. The revenue in case of long term service contracts is recognised on a monthly basis as per the schedule of maintenance when performance obligation is satisfied.

5. SUMMARY OF OTHER ACCOUNTING POLICIES

5.1 Share capital

Ordinary shares are classified as equity and recognised at their face value.

5.2 Earning per share

The Company presents earnings per share (EPS) data for its ordinary shares. EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period.

5.3 Borrowing costs

Borrowing costs are recognised as an expense in the period in which they are incurred except where such costs are directly attributable to the acquisition, construction or production of a qualifying asset in which case such costs are capitalised as part of the cost of that asset.

5.4 Foreign currency transactions and translation

The foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of transactions. The closing balance of non-monetary items is included at the exchange rate prevailing on the date of the transaction and monetary items are translated using the exchange rate prevailing on the reporting date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit and loss account with other income / other expenses.

5.5 Dividend and appropriation to reserves

Dividend and appropriation to reserves are recognised in the financial statements in the period in which these are approved.

	Sales offices and warehouses 21.1	Motor vehicles 21.2	Total
June 30, 2023	------ Rupees ------		
Balance at beginning of the year	77,730,778	96,891,848	174,622,626
Additions during the year	-	113,133,990	113,133,990
Interest accrued	3,581,572	25,195,359	28,776,931
Repaid / adjusted during the year	(38,706,044)	(72,912,716)	(111,618,760)
	42,606,306	162,308,481	204,914,787
Current portion grouped under current liabilities	(42,606,306)	(31,589,510)	(74,195,816)
	-	130,718,971	130,718,971

21.1 These represents lease contracts for registered office, branch offices and warehouses used by the Company in its operations and have lease terms between 1 to 3 years. These have been discounted using the incremental borrowing rate of the Company i.e. 22.16% (2023: 7.8%). These includes Rs.64,493 thousand (2023: Rs.15,937 thousand) due to Shirazi Investment Company (Private) Limited - the holding company and Rs.18,886 thousand (2023: Rs.4,573 thousand) due to Atlas Foundation - a related party.

21.2 Represents finance leases entered into with a financial institution for lease of motor vehicles. Lease rentals due under lease agreement are payable in quarterly installments latest by May 2029. Overdue rental payments are subject to an additional charge at 20% per annum. Taxes, repairs and insurance costs are to be borne by the Company. Financing rates ranging from KIBOR+0.30% to KIBOR+1% (2023: KIBOR+0.30% to KIBOR+1%) per annum have been used as discounting factor. These liabilities are secured by way of assigning title of vehicles in the name of the financial institution.

The future minimum lease payments to which the Company is committed under the agreements will be due as follows:

Particulars	Upto One Year	From one to five Years	Total 2024	Upto One Year	From one to five Years	Total 2023
	------ Rupees ------					
Minimum lease payments	126,914,753	428,398,388	555,313,141	106,030,584	179,163,475	285,194,059

Other provisions		**13,401,253**	21,685,112
		1,776,032,068	1,472,797,610

22.1 Includes Rs.675,847 thousand (2023: Rs.464,076 thousand) pertaining to Atlas Honda Limited - a related party and Rs.3,523 thousand (2023: Rs.6,606 thousand) pertaining to Atlas Insurance Limited - a related party.

22.2 Includes Rs.9,071 thousand (2023: Rs.178,044 thousand) pertaining to Atlas Global FZE.

22.3 Provision for gratuity

22.3.1 As stated in note 4.11.2, the Company operates an approved funded gratuity scheme for its management and non-management staff.

22.3.2 Plan assets held in trust are governed by local regulations which mainly includes Trust Act, 1882, Sindh Trust Act, 2020 as amended vide Sindh Trust (Amendment) Act, 2021, Companies Act, 2017, Income Tax Rules, 2002 and Rules under the Trust Deed of the Plan. Responsibility for governance of the Plan, including investment decisions and contributions schedules lies with the Board of Trustees. The Company appoints the trustees.

22.3.3 The latest actuarial valuations of the Schemes as at June 30, 2024 were carried out by an independent expert, using the 'Projected Unit Credit Method'. Details of the Scheme as per the actuarial valuation are as follows:

	Note	2024	2023

	Charge for the year		**96,300,105**	10,158,736
	Contributions made during the year		**(22,405,333)**	(16,413,438)
	Re-measurements recognised in other comprehensive income		**(20,180,719)**	12,246,597
	Recognised liability as at June 30,		**76,119,386**	22,405,333
22.3.10	**Plan assets comprise of:**			
	Debt securities		**11,241,565**	17,130,479
	Equity instrument - mutual funds units		**166,533,045**	95,259,496
	Cash and cash equivalent		**96,435**	86,501
			177,871,045	112,476,476

22.3.11 **Actuarial assumptions used**

		2024	2023
		-------- % per annum --------	
Discount rate at June 30,		**14.75%**	16.25%
Expected rate of increase in future salaries	- first year	**16.00%**	15.25%
	- long term	**16.00%**	15.25%
Demographic assumptions			
- Mortality rates (for death in service)		**SLIC (2001-05)-1**	SLIC (2001-05)-1
- Rates of employee turnover		**Moderate**	Moderate

22.3.12 **Description of the risks to the Company**

Morality risks - The risk that the actual morality experience is different. The effect depends on the beneficiaries' service/age distribution and the benefit.

Investment risks - The risk of the investment underperforming and not being sufficient to meet the liabilities.

Final salary risks - The risk that the final salary at the time of cessation of service is higher that what we assumed. Since the benefit is calculated on the final salary, the benefit amount increases similarly.

Withdrawal risks - The risk of higher or lower withdrawal experience than assumed. The final effect could go either way depending on the beneficiaries' service/age distribution and the benefit.

22.3.13 The Board of Trustess, passed the resolutions by circulation, on June 10, 2024, approved the revision of the existing gratuity payable criteria. The new criteria changes from 15 days' last drawn basic salary for each year of eligible service to a graduated scale of gratuity payable based on the length of eligible service, effective from June 1, 2024 resulting the past service cost.

22.3.14 **Sensitivity analysis for actuarial assumptions**

The sensitivity of the defined benefit obligation to changes in principal assumptions is:

	Impact on defined benefit obligation		
	Change in assump-tions	Increase in assumption	Decrease in assumption
		--------- Rupees ---------	
Discount rate	1.00%	(15,044,739)	16,945,430
Increase in future salaries	1.00%	15,763,324	(14,241,065)

The sensitivity analysis is based on a change in an assumption while holding all other assumptions constants. In practice, this is unlikely to occur, and change in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of defined benefit obligation calculated with the projected unit credit method at the end of reporting period) has been applied as when calculating the gratuity liability recognised within the statement of financial position.

The method and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

22.3.15 The expected return on plan assets was determined by considering the expected returns available on the assets underlying the current investment policy. Expected yields on fixed interest investments are based on gross redemption yields as at the reporting date.

22.3.16 Based on actuary's advice, the expected contribution and expense for the year ending June 30, 2025 to gratuity plans will be Rs.16,086 thousand and Rs.10,342 thousand respectively.

22.3.17 Maturity profile of the defined benefit obligation

	2024	2023
	--------- Rupees ---------	
Weighted average duration of the BPO	**6.28 years**	6.38 years
Distribution of timing of benefit payment		
Year 1	**27,784,441**	10,414,217
Year 2	**39,715,651**	18,930,693
Year 3	**23,801,939**	27,196,144
Year 4	**79,160,029**	16,303,095
Year 5	**26,705,908**	51,860,934
Years 6-10	**262,192,032**	149,215,292
Years 11-15	**368,074,141**	223,707,725
Years 16-20	**607,342,207**	456,812,294

22.4 This represents provision against infrastructure fee levied by the Government of Sindh through Sindh Finance (Amendment) Ordinance, 2001 and later. The levy of infrastructure fee is disputed and various companies had filed appeals before the High Court of Sindh (SHC) and also had obtained stay from the SHC. The SHC, on June 4, 2021, upheld the infrastructure levy by declaring it within competence of provincial legislature. The Company has filed an appeal before the Honourable Supreme Court of Pakistan to challenge this judgement, which is pending adjudication.

23. SHORT TERM BORROWINGS - Secured

	Note	2024	2023
		--------- Rupees ---------	
Murabaha / musharakah financing		**254,236,192**	166,998,946

Sale of operating fixed asset under Company policy	**1,237,222**	15,030,000

The related party status of outstanding balances as at June 30, 2024 is included in 'Capital work-in-progress - note 6.3', 'Trade debts - note 12.1', 'Long term loans and deposits - note 9.1', 'Trade deposits and short term prepayments - note 15.1 & 15.2', 'Short term investments - note 16', 'Other receivables - note 17.1', 'Lease liabilities - note 21.1' and 'Trade and other payables - note 22.1 & 22.2' respectively. These are settled in ordinary course of business.

34. REMUNERATION OF CHIEF EXECUTIVE OFFICER, DIRECTORS AND EXECUTIVES

The aggregate amounts charged during the year in respect of remuneration, including certain benefits, to the Chief Executive Officer, Directors and Executives of the Company are as follows:

	Directors - Chief Executive Officer		Directors - Others		Executives	
	2024	2023	2024	2023	2024	2023
	Rupees					
Remuneration and fee	30,000,000	26,650,039	450,000	350,000	238,854,263	197,093,592
Fee and Subscription	147,160	176,840	-	-	480,011	492,839
Bonus	10,000,000	5,309,508	-	-	77,105,902	29,887,854
Retirement benefits	1,941,180	1,591,764	-	-	14,978,454	11,775,235
Others	4,234,030	3,325,185	-	-	38,478,540	26,733,801
	46,322,370	37,053,336	450,000	350,000	369,897,170	265,983,321
Number of persons	1	1	1	1	64	41

34.1 The Company provides the Chief Executive Officer and Chief Operating Officer with free use of the Company maintained car.

34.2 Remuneration to directors

Aggregate amount charged in these financial statements for meeting fee to one (2023: one) non-executive director was Rs.450 thousand (2023: Rs.350 thousand).

35. FINANCIAL RISK MANAGEMENT

35.1 Financial risk factors

The Company has set up objectives and policies to manage risks that arise in connection with financial instruments. The risk management framework and policies of the Company are guided by specific objectives to ensure that comprehensive and adequate risk management policies are established to mitigate salient risk elements in operations of the Company. The establishment of overall financial risk management objectives is consistent and in tandem with the strategy to create and enhance shareholders' value, whilst guided by a prudent and robust framework of risk management policies.

In achieving the objective of maximizing returns to shareholders, the Board of Directors takes cognizance of the risk elements that the Company is confronted within its operations. In view of the multi-faceted risks inherent in the financial sector, the Company places great emphasis on importance of risk management and has put in place clear and comprehensive risk management mechanisms and strategies to identify, monitor, manage and control the relevant risk factors.

The Company has exposure to the following risks from its use of financial instruments:

- credit risk;
- liquidity risk; and
- market risk (including foreign exchange risk, interest rate risk and price risk).

(a) Credit risk

Credit risk represents the financial loss that would be recognised at the reporting date if counter parties fail completely to perform as contracted / fail to discharge an obligation / commitment that they have entered into with the Company. Credit risk arises principally from long term and short term investments (excluding investment in government securities), loans and receivables (long term and short term), deposits, receivable from funds under management, other receivables, and bank balances. Management believes that the Company is not exposed to any significant credit risk from investments in or receivables from funds which are managed by the Company itself. The risk of default is considered minimal due to inherent systematic measures taken therein.

The carrying amounts of financial assets that represent Company's maximum credit exposure as at the reporting date are as follows:

	Note	2024	2023
		--------- Rupees ---------	
Long term loans and deposits	9	**8,083,222**	6,989,832
Trade debts	12	**1,455,196,899**	1,278,006,394

HBL Cash Fund	AA+(f)		JCR-VIS	**104,262,444**	73,305,667

(b) **Liquidity risk**

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due. Prudent liquidity risk management implies maintaining sufficient cash and cash equivalents and readily marketable securities. The maturity profile is monitored to ensure adequate liquidity is maintained.

The Company is not materially exposed to liquidity risk as all material obligations / commitments of the Company are short term in nature.

Financial liabilities in accordance with their contractual maturities are presented below:

	Carrying amount	Contractual cash flows	Maturity upto one year	Maturity more than one year
	Rupees			
June 30, 2024				
Long term deposits	14,026,677	14,026,677	3,020,687	11,005,990

Accrued mark-up	56,809,797	56,809,797	56,809,797	-
	2,544,208,897	2,657,164,173	2,470,551,329	186,612,844

(c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimising the return.

(d) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of the changes in foreign exchange rates. The company has both receivable and payable balances in foreign currency which acts as a natural hedge to company's exposure. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expenses are denominated in a different currency from the Company's functional currency).

	2024	2023
Trade payables - US Dollar	**870,743**	2,062,176
Trade payables - JPY	**1,731,124**	-
	Rupees	
Exchange rate – US Dollar	**278.80**	287.10
Exchange rate – JPY	**1.73**	-

The following table demonstrates the sensitivity to a reasonably possible change in the US dollar exchange rate, with all other variables held constant, of the Company's profit before tax and the Company's equity.

	Change in USD / JPY / rates (%)	Effect of translation of foreign currency asset on profit or loss	Effect on equity
		--------- Rupees	---------
2024	**-5**	**12,287,943**	**12,287,943**
	+5	**(12,287,943)**	**(12,287,943)**
2023	-5	29,602,536	29,602,536
	+5	(29,602,536)	(29,602,536)

(e) **Interest rate risk**

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rate relates primarily to the Company's short term borrowings and lease liabilities (motor vehicles). Management of the Company estimates that 1% increase in the market interest rate, with all other factor remaining constant, would decrease the Company's profit before tax by Rs. 4,447 thousand and a 1% decrease would result in the increase in the Company's profit before tax by the same amount. However, in practice, the actual result may differ from the sensitivity analysis. The company manages it's interest rate risk obtaining quotes for interest rate from various reputable banks and opting for the lowest price offered amongst them.

35.2 **Financial instruments by categories**

At reporting date, all of the financial instruments held by the Company are classified at amortised cost except for short term investments which are carried at fair value through profit or loss.

35.3 **Capital risk management**

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The Company manages its capital structure by monitoring return on net assets and makes adjustments in the light of changes in economic conditions. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders and / or issue new shares. There was no change to the Company's approach to capital management during the year. The Company monitors capital on the basis of gearing ratio calculated as follows:

	2024	2023
	--------- Rupees	---------
Total borrowings	**632,872,650**	870,648,349
Bank balances	**(441,527)**	(695,848)
